

Dear FCC.

I respectfully request that you do not act upon the request from the NAB. I subscribe to XM and have for at least 2 years and think it is the greatest. My husband and I drive across country in a semi-truck and the Instant traffic and weather is invaluable. We are able to find out what is happening before we get there and can route ourselves away from problems on the road when possible. I am sure that the local police welcomes the diversion of traffic also.

I have no idea what kind of a threat the NAB feels XM is to them. I personally am sick of the junk they are constantly trying to shove down my throat. When I have to listen to a local station in a large city they run by information so fast that you can't follow. They also use the local names for roads and hwy's. I do not know the local terms. XM's traffic and weather is VERY detailed and if I miss something I know that I can hear it again in a very short time.

I have much more to say but I would like to keep this short because I know your time is valuable. I do thank you for reading my comments. And again let me say I would be ever so happy if you would tell NAB to take some of their lobbyist money and use it to improve their own system, and take care of their own business and stay out of other people's. I would not be paying for XM if I didn't REALLY like it.

Thanks again, respectfully, Diana Bunker
